Subject: Absurd Penalty Settlement - GET A CLUE, DOJ !!!

The proposed penalty in the MS Anti-Trust suit is ABSURD!

What are you people thinking?

If MS is to give away software as part of a settlement, NONE of it should be MS software, which it manufactures for free. If MS is going to give away computers and software, they should be forced to BUY COMPETING systems running Solaris, LINUX, and OSX.

Your proposed settlement is only giving MS ADDITIONAL opportunities to monopolize.

Make MS buy and give away COMPETITORS' software, NOT their own!!!!
